

# Specification Sheet

Description ***Sapphire Generator Management Solution (SGMS)***

Sapphire Generator provides a full onsite breakdown of fuel costs, giving you the information needed to reconcile and account for the total amount of fuel consumed and delivered, on site, live. Sapphire Generator will record, and report live to our cloud, fuel delivered to site, fuel stored in your bulk tank and the fuel burn of up to 4 generators feeding from the one bulk tank and also light vehicle refuelling functionality.

Sapphire Generator uses real-time technology to monitor and report all activity between the bulk tank and generators measuring all fuel delivered to all generators and fuel returned to the bulk tank to calculate the exact burn-rate of each generator. The Sapphire Online offers the following:

## Specifications

- 🔴 Sapphire Generator terminal in total
- 🔴 1 x user guide
- 🔴 Secure technology to track every litre
- 🔴 Centralised reporting
- 🔴 Cost effective solution for small, medium and large fleet operations
- 🔴 Access TSM from device connected to WIFI/internet
- 🔴 Unlimited users have access to the TSM website and complete control of who can access and modify transaction and stock data.
- 🔴 Part number: SAPPH-0007

**Optional extras available contact Fuelchief directly.**
