

BUSINESS PACKAGE

The Business Package is for those clients who are looking after a range of sites and a number of fleet vehicles; therefore, trying to eliminate downtime. The Business Package uses the smart Sapphire Lite FMS (pictured left) which allows for 250 users, is accessed by either a PIN or contactless tag and can store up to 4,000 transactions in the memory. The information that is captured in the Sapphire Lite FMS is then downloaded via a small USB device and transferred to any computer that is connected to the internet (no software is needed due to the cloud-based system). This method allows for quick tracking of vehicle/driver and stock reporting. These packages include the Piusi E120 pump and auto-shut off nozzle (pictured centre) and the option of a hose tower delivery system (pictured right). Listed are the Business Slimline Series package options:
