

## ECONOMY PACKAGE

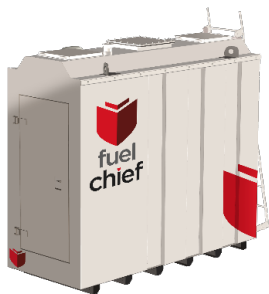

The Economy Package is for the client who wants to keep a closer eye on monitoring his fuel down to the last litre. This tank package includes a Donaldson filter (pictured) and uses a PIN operated fuel management system (far left image) to ensure security and monitoring. The user simply enters their PIN and once approved, allows re-fuelling to happen. There is also the option of entering vehicle registration and kilometres/miles if you wish. This is all set-up on the on-board memory that will store up to 255 transactions. The manager key provided with this package is used to download the transaction data and upload to the managers computer that has the correct monitoring software loaded onto, where fuel usage reports can be generated and presented to management (pictured centre). Delivery via hose tower is an option in this package (pictured right). Our Economy Slimline Series packages are below:
