

# Specification Sheet

Description **Fuelchief Pyrotector**

Part No **PY**

The Pyrotector fuel tank is the 2-hour fire resistant storage tank that offers a light-weight solution to your fuel storage problems. Made with a double-skin steel tank design, the Pyrotector fuel tanks require no further bunding and provide 100% secondary containment. These tanks can be configured for various industries and either painted or unpainted (such as the stainless-steel tank pictured above).

## Summary of Benefits & Features

- 🔥 **Extra security:** secondary contained primary tank
- 🔥 **Compliant:** with international approvals and certifications for UL142 and SwRI 97-04
- 🔥 **Fire proof:** 2 hours fire exposure resistant
- 🔥 **Emergency venting:** for primary and secondary containment
- 🔥 **Interstitial monitoring:** capability
- 🔥 **Maximum protection:** a 3-coat industrial painting system for maximum protection
- 🔥 **Customised for your needs:** multiple compartment tank configurations
- 🔥 **Can store combustible liquids:** approved for combustible liquids
- 🔥 **Earthquake proof:** integral pedestal supports provide seismic anchoring to AS1170
- 🔥 **Durable light weight design:** low transport costs due to light-weight construction
- 🔥 **Impact protected:** rated in compliance with safe work instrument
- 🔥 **Cylindrical design:** available in cylindrical constructions up to 110,000 litres
- 🔥 **Rectangular design:** available in rectangular constructions up to 7,000 litres
- 🔥 **Manufactured locally:** in our New Zealand branch
- 🔥 **Warranty:** 10-year warranty
