

## DC100 BUSINESS

### SERIOUS ABOUT MANAGING FUEL & MINIMISING DOWNTIME

The **Business package** is for those clients who are looking after a range of sites and a higher number of fleet vehicles, therefore reducing downtime. The Business package uses the smart Sapphire Lite fuel management system, which allows pin or tag access for 250 users with an internal memory of 4,000 transactions.

## WHAT ARE THE BENEFITS FOR YOUR BUSINESS?

### Security

Fuel theft is a big problem nationwide and our Business package puts a stop to that, restricting access to only those supplied with contactless tags or PINs.

### Saves Money

Onsite fuel saves money. Having a depot tank will save you money on every litre of fuel and prevent unnecessary extra purchases from service stations.

### Save Time

Onsite fuel will reduce refuelling labour time by 100's of hours per year. No more waiting in queues to refuel or to pay. Just refuel and you're ready for tomorrow.

### Greater Control

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

### Low Maintenance

The innovative design of the DC Series tanks means no internal bracing (no safety risks) and simple condensation catchment and recovery.

### Easy Refuelling

Open the cabinet and lift the nozzle to activate the pump making it very easy to fill up your diesel-powered machinery without delays.

The **DC100** is a compact unique tank that only takes up a car parking space, making it ideal for populated areas where space can be tight. The DC100 is ideal for businesses that need fast reliable access to fuel, through a compact tank.

The DC100 comes complete with tank vent, contents gauge, dipstick, two suction ports and two return ports. The sloping floor and water suction port present in the DC100 (and our complete DC Series range of products) ensures for easy water catchment and removal, therefore giving the client some peace of mind that fuel is kept clean.

- 🔴 10,450L model with large secure cabinet to house all pumps and equipment
- 🔴 Full height access door with 3-way locking system and anti-levering design for extra security
- 🔴 Cabinet has access hatch through roof to allow safe servicing of tank vent
- 🔴 Hempel C4-High Marine grade paint system
- 🔴 Lockable access door to fuel management terminal
- 🔴 Spill sump in cabinet base to contain spillage
- 🔴 Improved inner tank design with no internal bracing
- 🔴 Sloped floor in inner tank for better water catchment and recovery
- 🔴 Water inspection and suction port housed under lockable hatch
- 🔴 Large access manhole for maintenance and inspection of inner tank
- 🔴 Extra feed and return ports for running auxiliary equipment
- 🔴 Offset fill pipe with Todo Dry-Break coupling for rapid refuelling
- 🔴 Lockable fill point with integrated dipstick
- 🔴 1100 LPM rated and approved overfill prevention valve for safe filling and prevention of accidents
- 🔴 Base of tank sealed in an anti-rust underseal

### Dimensions (mm) (W x L x H)

2310 x 2996 x 2550

### Capacity (Total)

10,450 Litres

### Capacity (SFL)

9,900 Litres

### Design Approval

TNK 15024

### Design Standard

AS1692

### Weight (Empty)

2470 Kg
