

## **DC100 ECONOMY**

KEEPING A CLOSER EYE ON  
FUEL USAGE

The **Economy package** is for the client who wants to keep a closer eye on monitoring fuel down to the last litre. This tank package includes high-grade Donaldson filtration and uses the Piusi PIN operated system to ensure security and monitoring. The user simply enters their PIN and once approved, allows re-fuelling to happen. Along with a storage capacity of 255 transactions, the system can also log vehicle registration, kilometres/miles for fuel usage reports to management. These are easily downloadable through the 'Manager Key'.

### **WHAT ARE THE BENEFITS FOR YOUR BUSINESS?**

#### **Safe Refuelling, Easy & Compliant**

No circular tanks here. Just an efficient DC100 diesel fuel tank. Compact with fully housed pumping equipment, makes it the perfect out of the way solution.

#### **Save Time**

Downtime is reduced significantly with onsite refuelling. Our clients have saved up to 15 minutes per fill, which over weeks, begins to stack up.

#### **Low Maintenance**

The innovative design of the DC Series tanks means no internal bracing (no safety risks) and simple condensation catchment and recovery.

#### **Saves Money**

You are in control of who you purchase your fuel off at wholesale prices. This will automatically save you more year on year than paying at the service station.

#### **Greater Control**

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

#### **Stop Fuel Theft**

Fuel theft is a big problem nationwide. Our Economy package is the perfect option, restricting access to only those supplied with a user keys or PINs.

The **DC100** is a compact unique tank that only takes up a car parking space, making it ideal for populated areas where space can be tight. The DC100 is ideal for businesses that need fast reliable access to fuel, through a compact tank.

The DC100 comes complete with tank vent, contents gauge, dipstick, two suction ports and two return ports. The sloping floor and water suction port present in the DC100 (and our complete DC Series range of products) ensures for easy water catchment and removal, therefore giving the client some peace of mind that fuel is kept clean.

- 9,900L SFL model with full height cabinet to house all pumps and equipment
- 3-way door locking system and anti-levering design for extra security
- Cabinet has access hatch through roof to allow safe servicing of tank vent
- Hempel C4-High Marine grade paint system
- Spill sump in cabinet base to contain spillage
- Improved inner tank design with no internal bracing for safe servicing
- Sloped floor in inner tank for better water catchment and recovery
- Water inspection and suction port housed under lockable hatch
- Large access manhole for maintenance and inspection of inner tank
- Extra feed and return ports for running auxiliary equipment
- Lockable fill point with integrated dipstick
- Offset fill pipe with Todo Dry-Break coupling for rapid refuelling
- 1100 LPM rated & approved overfill prevention valve
- Base of tank sealed in an anti-rust underseal

### Dimensions (mm) (W x L x H)

2310 x 2996 x 2550

### Capacity (Total)
