

## DC100 REMOTE PLUS

NO POWER, NO PROBLEM – BRING  
FUELLING TO WHERE THE ACTION IS

The **Remote Plus package** is a diesel powered package that is ideal for those clients who do not have a direct 230v power source available. Examples are tanks placed in remote areas such as rural pit-stops, rural businesses or just areas where there isn't power available.

## WHAT ARE THE BENEFITS FOR YOUR BUSINESS?

### Place Tank Where It Suits You

Remote Plus package allows versatile placement of the tank onsite. No need to dig trenches to bury a power cable, and if you move site, just pick up the tank and move it too.

### Save Time

Downtime is reduced significantly with onsite refuelling. Our clients have saved up to 15 minutes per fill, which over weeks, begins to stack up.

### Low Maintenance

The innovative design of the DC Series tanks means no internal bracing (no safety risks) and simple condensation catchment and recovery.

### Cut Fuel Costs

Onsite fuel saves money. Having a depot tank will save you money on every litre of fuel and prevent unnecessary extra purchases from service stations.

### Greater Control

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

### Stop Fuel Theft

Fuel theft is a big problem nationwide. Our Economy package is the perfect option, restricting access to only those supplied with a user keys or PINs.

The **DC100** is a compact unique tank that only takes up a car parking space, making it ideal for populated areas where space can be tight. The DC100 is ideal for businesses that need fast reliable access to fuel, through a compact tank.

The DC100 comes complete with tank vent, contents gauge, dipstick, two suction ports and two return ports. The sloping floor and water suction port present in the DC100 (and our complete DC Series range of products) ensures for easy water catchment and removal, therefore giving the client some peace of mind that fuel is kept clean.

- 🔧 10,450L model with large secure cabinet to house all pumps and equipment
- 🔧 Full height access door with 3-way locking system and anti-levering design for extra security
- 🔧 Cabinet has access hatch through roof to allow safe servicing of tank vent
- 🔧 Hempel C4-High Marine grade paint system
- 🔧 Lockable access door to fuel management terminal
- 🔧 Spill sump in cabinet base to contain spillage
- 🔧 Improved inner tank design with no internal bracing
- 🔧 Sloped floor in inner tank for better water catchment and recovery
- 🔧 Water inspection and suction port housed under lockable hatch
- 🔧 Large access manhole for maintenance and inspection of inner tank
- 🔧 Extra feed and return ports for running auxiliary equipment
- 🔧 Offset fill pipe with Todo Dry-Break coupling for rapid refuelling
- 🔧 Lockable fill point with integrated dipstick
- 🔧 1100 LPM rated and approved overfill prevention valve for safe filling and prevention of accidents
- 🔧 Base of tank sealed in an anti-rust underseal

### Dimensions (mm) (W x L x H)

2310 x 2996 x 2550

### Capacity (Total)

10,450 Litres

### Capacity (SFL)

9,900 Litres

### Design Approval

TNK 15024

### Design Standard

AS1692

### Weight (Empty)

2470 Kg
