

## DC25 BUSINESS

SERIOUS ABOUT MANAGING FUEL  
& MINIMISING DOWNTIME

The **Business package** is for those clients who are looking after a range of sites and a higher number of fleet vehicles, therefore needing to reduce downtime. The Business package uses the smart Sapphire Lite fuel management system, which allows pin or tag access for 250 users with an internal memory of 4,000 transactions.

### WHAT ARE THE BENEFITS FOR YOUR BUSINESS?

#### Safe Refuelling, Easy & Compliant

Fuel theft is a big problem nationwide and our Business package puts a stop to that, restricting access to only those supplied with contactless tags or PINs.

#### Save Time

Onsite fuel will reduce refuelling labour time by 100's of hours annually. No more waiting in queues at the service station. Refuel onsite and you are ready for tomorrow.

#### Low Maintenance

The innovative design of the DC Series tanks means no internal bracing (no safety risks) and simple condensation catchment and recovery.

#### Saves Money

Onsite fuel saves money. Having a depot tank will save you money on every litre of fuel and prevent unnecessary extra purchases from service stations.

#### Greater Control

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

#### Easy Refuelling

Open the cabinet and lift the nozzle to activate the pump making it very easy to fill up your diesel-powered machinery without delays.

The DC Series is a robust tank designed with no internal bracing. The smallest in the series is the **DC25**, ideal for SME operations or as a back-up tank for generators and pumps. The DC25 provides 110% secondary containment while the full height internal pump cabinet makes it ideal for security and quick refuelling.

This model comes complete with tank vent, contents gauge and dipstick. The sloping floor and water suction port ensures easy water catchment and removal. Below are some of the key features of this tank:

- 🔴 2,500L model with large secure cabinet to house all pumps and equipment
- 🔴 Full height access door with 3-way locking system and anti-theft design for extra security
- 🔴 Hempel C4-High Marine grade paint system
- 🔴 Spill sump in cabinet base to contain spillage
- 🔴 Improved inner tank design with no internal bracing for safe servicing
- 🔴 Sloped floor in inner tank for better water catchment and recovery
- 🔴 Water inspection and suction port housed under lockable hatch
- 🔴 Large access manhole for maintenance and inspection of inner tank
- 🔴 Extra feed and return ports for running auxiliary equipment
- 🔴 Lockable fill point with integrated dipstick
- 🔴 Base of tank sealed in an anti-rust underseal

### Dimensions (mm) (W x L x H)

1160 x 2586 x 1600

### Capacity (Total)

2,500 Litres

### Capacity (SFL)

2,370 Litres

### Design Approval

100111-0016142

### Design Standard

AS1692

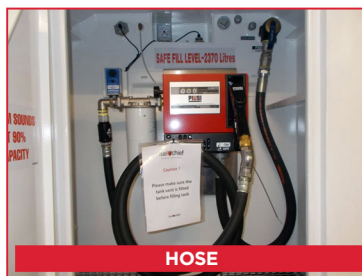

### Weight (Empty)

950 Kg
