

## DC50 SECURITY PLUS FAST AND SECURE ONSITE REFUELLING

The **Security Plus package** is for the client who wants extra flow when pumping fuel. This package features an impressive 100LPM pump kit with superior filtration to ensure clean fuel every time. The pump kit is fitted into the lockable pump bay ensuring safety and security of your fuel supply.

Added piece of mind comes in the form of the Fuelchief Access 85 Controller, which allows activity for authorised users with an easy touch-and-turnkey. In the event of an emergency, the built-in emergency stop button will cease all operation.

## WHAT ARE THE BENEFITS FOR YOUR BUSINESS?

### Stop Fuel Theft

Fuel theft is a big problem nationwide. The Access 85 is the perfect option, restricting access to only those supplied with a user key.

### Save Time

Onsite fuel will reduce refuelling labour time by 100's of hours per year. No more waiting in queues to refuel or to pay. Just refuel and you're ready for tomorrow.

### Low Maintenance

The innovative design of the DC Series tanks means no internal bracing (no safety risks) and simple condensation catchment and recovery.

### Saves Money

Onsite fuel saves money. Having a depot tank will save you money on every litre of fuel and prevent unnecessary extra purchases from service stations.

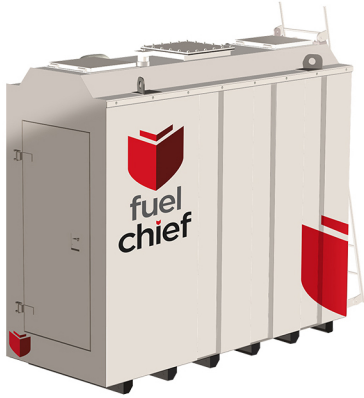

### Greater Control

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

### Easy Refuelling

Open the cabinet and lift the nozzle to activate the pump making it very easy to fill up your diesel-powered machinery without delays.

The **DC50** is the tank that sits in half a car space and takes up less than 3.5m<sup>2</sup>. Occupying such a small footprint makes it a great solution for those operations that have limited room available, yet still need fast and reliable access to fuel.

Our most popular model comes complete with tank vent, contents gauge and dipstick. The sloping floor and water suction port ensures easy water catchment and removal. Below are some of the key features of this tank:

- 🔧 4,629 SFL model with full height cabinet to house all pumps and equipment
- 🔧 3-way door locking system and anti-levering design for extra security
- 🔧 Cabinet has access hatch through roof to allow safe servicing of tank vent
- 🔧 Hempel C4-High Marine grade paint system
- 🔧 Spill sump in cabinet base to contain spillage
- 🔧 Improved inner tank design with no internal bracing for safe servicing
- 🔧 Sloped floor in inner tank for better water catchment and recovery
- 🔧 Water inspection and suction port housed under lockable hatch
- 🔧 Large access manhole for maintenance and inspection of inner tank
- 🔧 Extra feed and return ports for running auxiliary equipment
- 🔧 Lockable fill point with integrated dipstick
- 🔧 Offset fill pipe with Todo Dry-Break coupling for rapid refuelling
- 🔧 1100 LPM rated & approved overfill prevention valve
- 🔧 Base of tank sealed in an anti-rust underseal

### Dimensions (mm) (W x L x H)

1150 x 2996 x 2550

### Capacity (Total)

5,000 Litres

### Capacity (SFL)

4,629 Litres

### Design Approval

TNK 15024

### Design Standard

AS1692

### Weight (Empty)

1600 Kg
