

SBD1300 BASE ONSITE REFUELING MADE EASY

The Sebco 1300L **Base Package** is our most cost-effective solution for a compliant self-bundled Polyethylene diesel tank perfect for Farmers & Contractors throughout New Zealand.

These tanks are cost-effective, tough, secure and will not rust or leak. They are also easy, safe and efficient to fill and dispense from and guaranteed to keep your fuel clean.

This tank comes with the sturdy Italian 'Piusi' Panther 230v electric pump and a 4m hose with Manual Nozzle.

WHAT ARE THE BENEFITS FOR YOUR BUSINESS?

Security

The compliant Sebco tanks are double-skinned and boast a secure, lockable pump cabinet to ensure safety of your equipment and provide a deterrent from would-be thieves.

Saves Money

Onsite fuel saves money. Having an onsite tank will save your money on every litre of fuel and prevent unnecessary extra purchases from service stations.

Saves Time

Onsite fuel will reduce refuelling labour time by 100's of hours per year. No more waiting in queues to refuel or to pay. Just refuel and you are ready for tomorrow.

Greater Control

It's never been a better time to get your business costs under control and being in control of your fuel costs makes sense.

Low Maintenance

Because the inner tank is insulated from the environment, condensation is reduced, keeping fuel cleaner with no costly repairs to vehicle injector pumps.

Easy Refuelling & Tracking

Open the cabinet and lift the nozzle to activate the pump, making it very easy to fill up your diesel-powered machinery and track how much fuel you're pumping.

The **Sebco 1300 Diesel Stations** are the only Worksafe compliant Polyethylene self bunded diesel tanks in New Zealand. Our products are designed to provide the users with fuel storage facilities that are smart, safe, secure and compliant.

In a world where environmental protection, workplace safety and efficiency, security, compliance, record management and fuel cleanliness are priorities, Sebco products tick all the boxes.
